

CHAPTER- 1 - INTRODUCTION TO COMPUTERS

TWO MARK QUESTIONS:

1. What is a Computer?
2. **Distinguish between Data and Information.**
3. **What are the component of the computer?**
4. Write the functions of Arithmetic and Logic Unit
5. Write the functions of control unit.
6. What is the function of memory?
7. Differentiate Input and Output unit.
8. **Distinguish between Primary memory and Secondary Memory.**

THREE MARKS QUESTIONS.

1. **What are the Characteristics of Computer?**
2. Write the applications of computer.
3. What is input device? Give two examples.
4. Explain any three output devices.
5. Differentiate optical and Laser Mouse.
6. **Write short note on impact printer.**
7. **Write the characteristics of sixth generation.(all generation characters is important)**
8. **Write the significant features of Monitor.**

FIVE MARKS QUESTIONS.

1. **Explain the various components of a computer with neat diagram**
2. **Discuss the types of generation in computer**
3. **Explain the various input devices.**
4. Explain the various output devices.
5. **Explain printer and its types .**

*St. Joseph Study Centre
Puducherry, Ph. No.: 9042247637*

ADDITIONAL 2M & 3M QUESTIONS.

1. Explain types of mouse? And write mouse actions .
2. Examples of first, second and third generation computers.
3. What is POST?
4. Booting process? Explain its types.
5. What is NLP?
6. What is IC?
7. What is bootstrap loader?
8. What is called data processing?
